

Policy-as-a-Service

Exploring the potential of a service-oriented approach to policy design and implementation.

Systemic Design Community of Practice
December 10, 2019

CoLab.
Complexity | Collaboration | Co-design | Co-creation

Systemic Design Community of Practice

Our Aspirations:

- **Build** the field of practice around systemic design and social innovation approaches in the GoA.
- **Catalyze** and **inspire** new ways of working on old problems.
- **Provide** a safe space for GoA staff to learn from each other, with each other.

We do this by:

- **Designing** sessions with a mix of theory and learning by practicing.
- Being **open** and willing to share our experiences with others.
- Having **fun**—we take our work seriously, not ourselves.

Hunting for Diamonds:

Rapidly forming new connections

- Find the diamond to your hammer, and vice versa.
- 3 minutes to “chisel” away until you find something in common.

AGENDA

- **Service Design Recap**
- **Policy-as-a-Service**
- **Prototype Exploration/BYOPA**

Learning Objectives

- 1 Be able to explain how and why it is useful to think about policy as a service.
- 2 Understand the key differences that taking a service design orientation would make to the current policy cycle.
- 3 Gain insights on how to build service design approaches into policy work.

A few caveats:

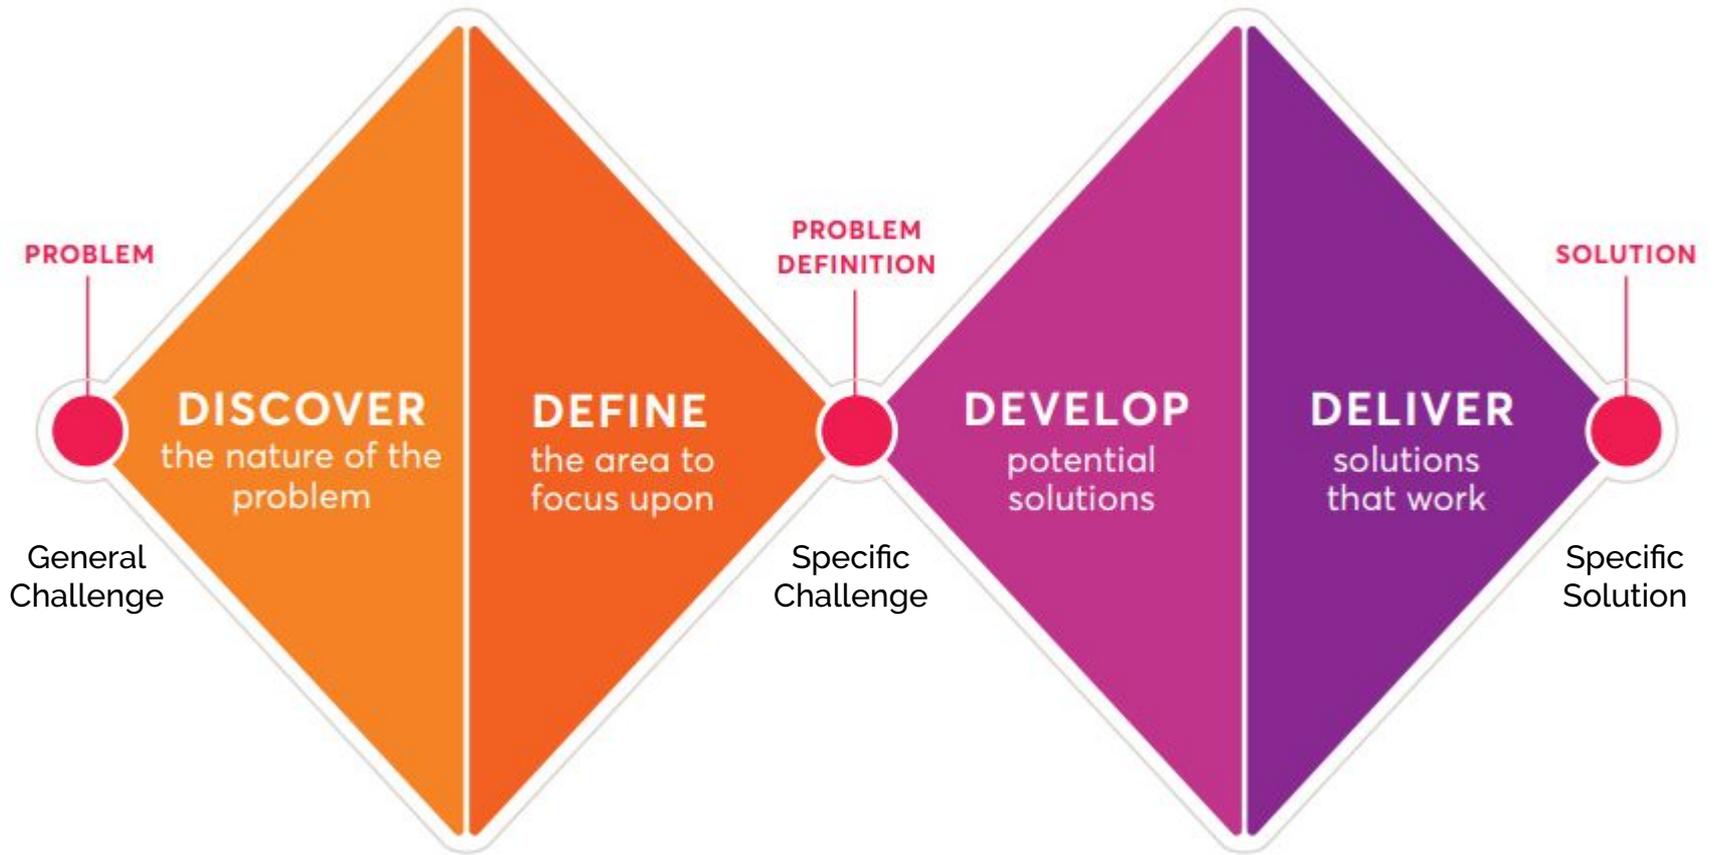

- 1 Mostly provocations of a designer trying to find his way in a policy world.
- 2 Relying on your input to guide, challenge, and/or reframe the content and ideas put forth today.
- 3 Approaches described are not intended to replace any existing processes, but supplement and offer alternatives when conventional ones struggle to deliver.

What is design?

Design is the rendering of intent.

as Intent

WHAT GOVERNMENT SAYS

SERVICE DESIGN RECAP

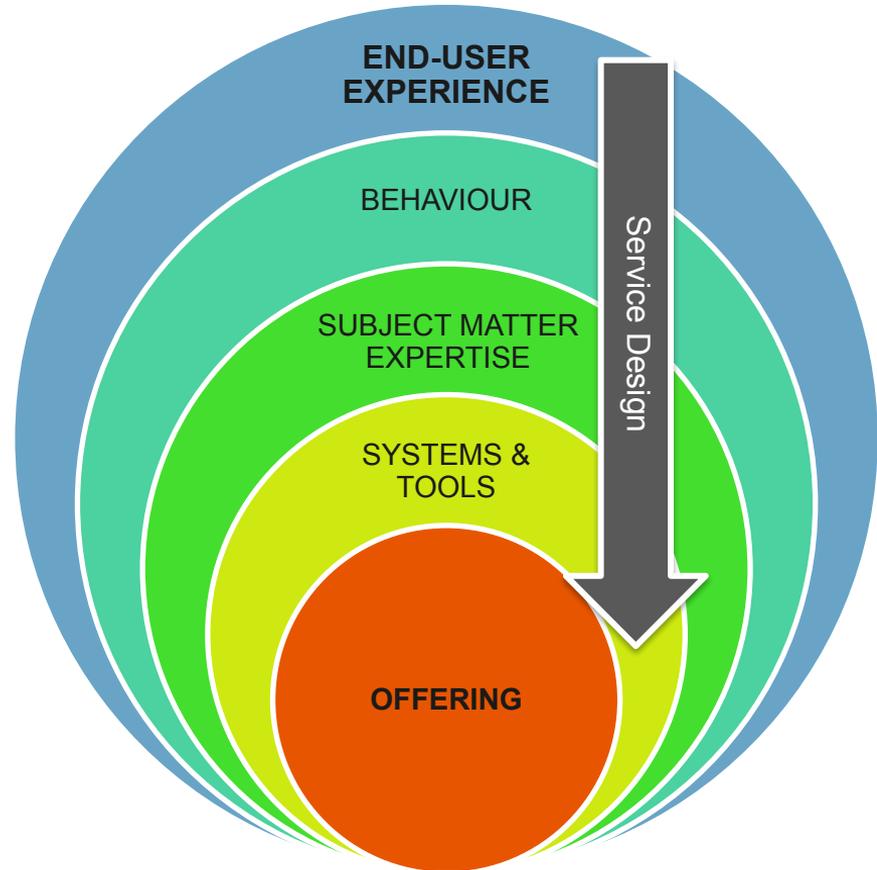

Service Design is a holistic approach that considers the end-to-end service experience across all channels and touchpoints, from a customer and organizational perspective.

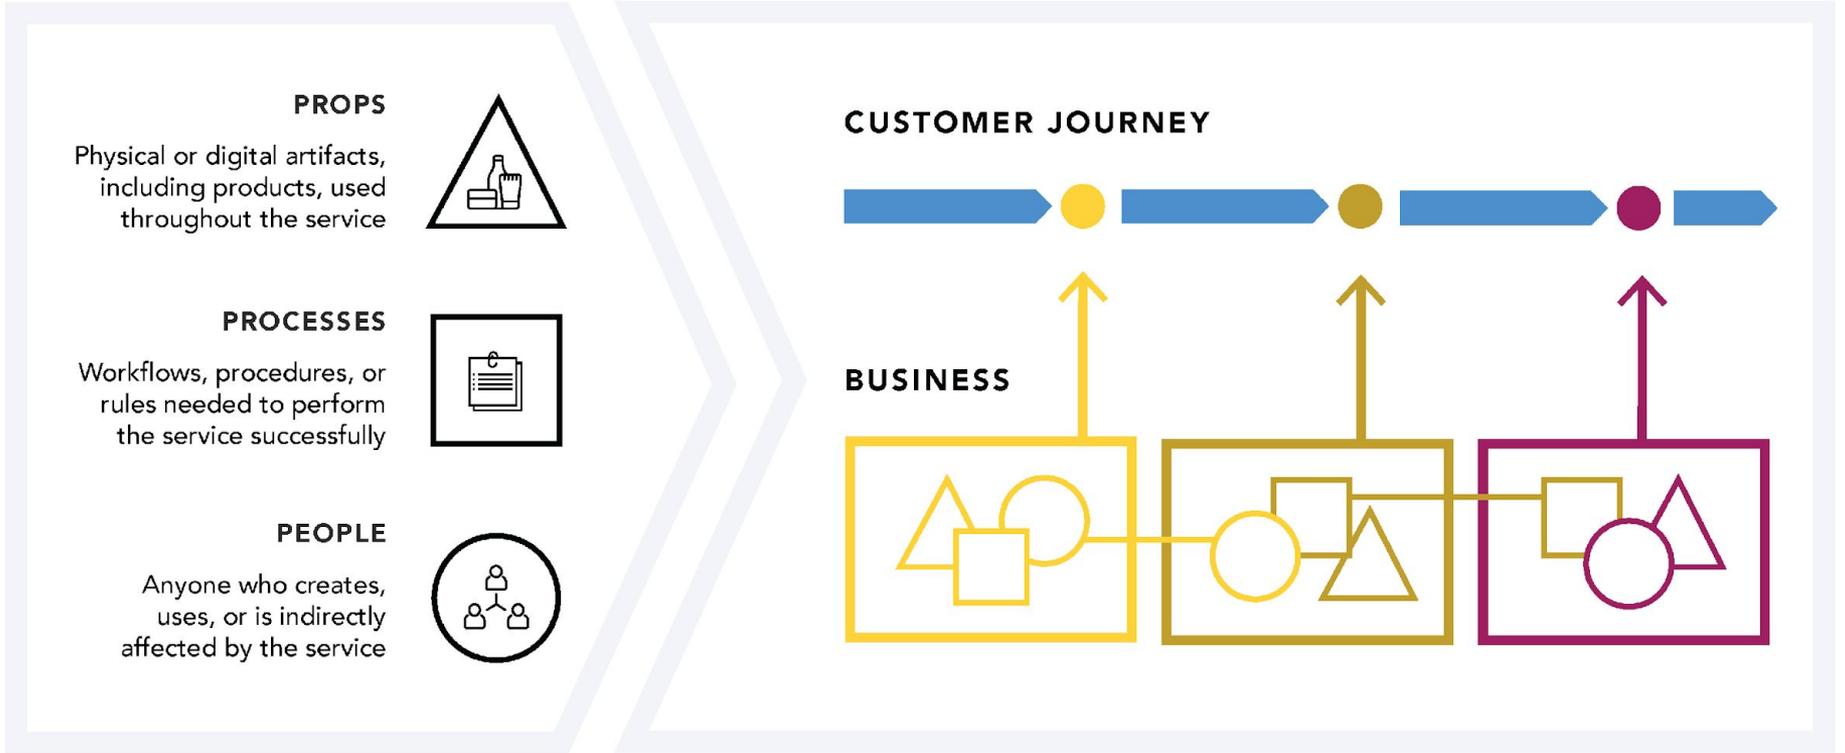

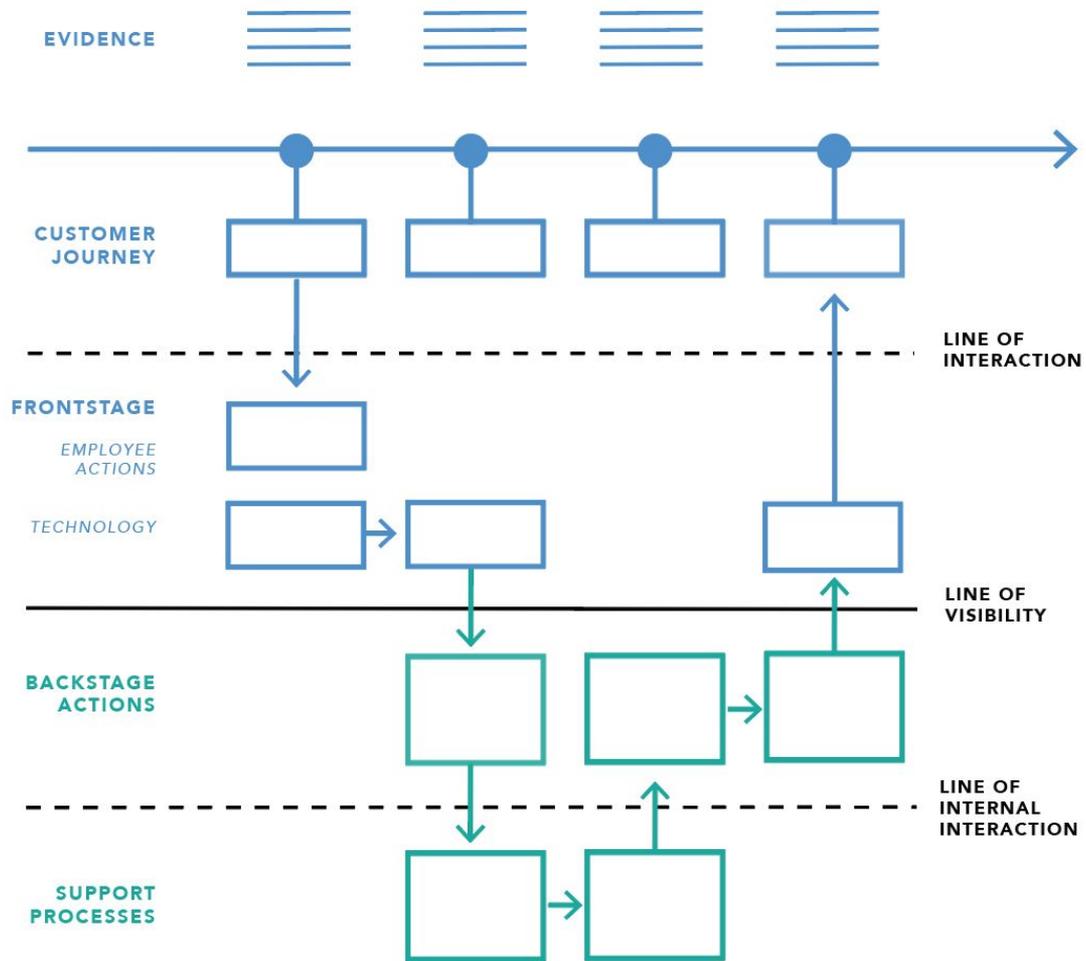

Layers of Experience

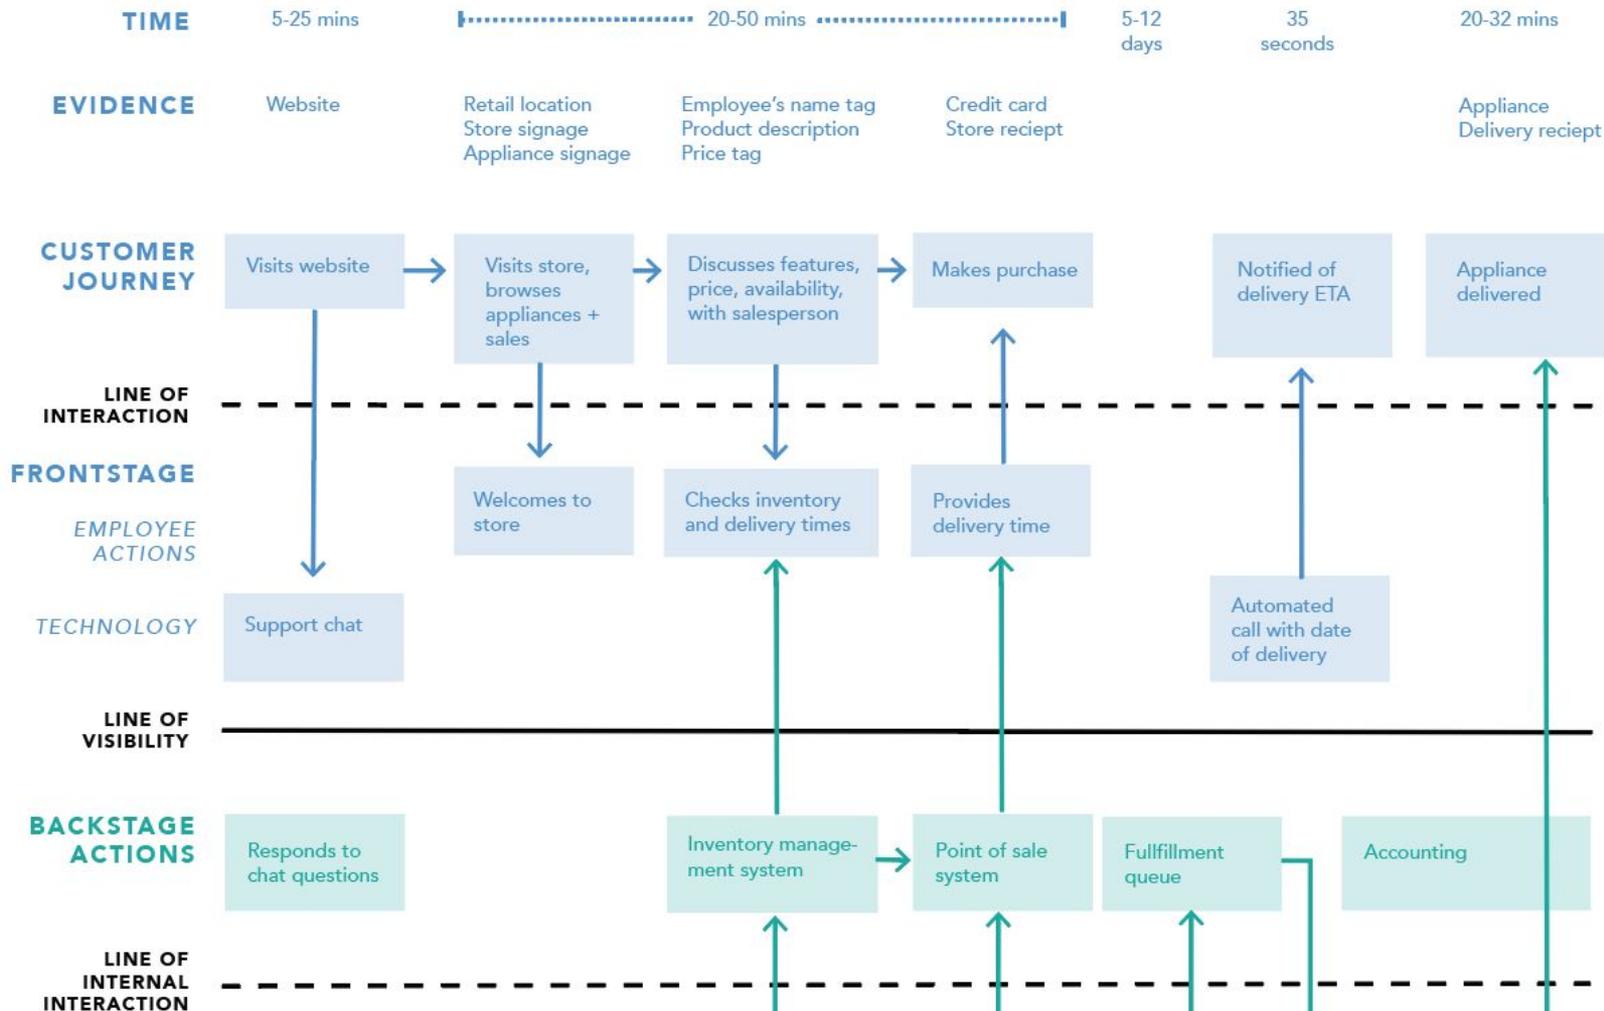

End-users must traverse all layers to get to the core offering.

Each layer has the potential to affect the perception of the service and the organization.

CURRENT STATE ASSESSMENT

How does design show up in the current policy process?

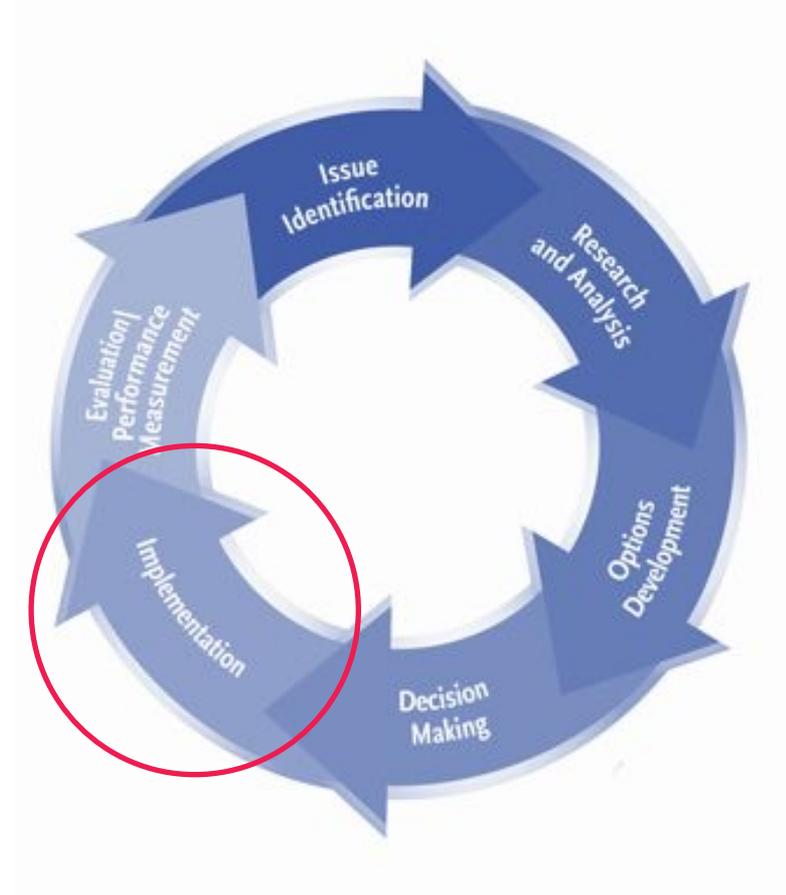

Working Assumptions

- Current policy cycle provides rational framework for developing policy.
- Older systems are simply no longer able to cope with the tremendous changes that are reshaping the world around us. **Government needs to keep up with the speed of change.**
- We see attempts in the form of digitization, automation, incremental process improvements, external contracting as signals of government trying to keep up.
- Growing disconnect between citizen expectations and government action.

Current State of Design & Policy

- Service Design is typically restricted to service delivery and implementation.
- Implementation teams work with limited context and feedback.
- Little room for collaboration with policymakers once it reaches implementation.

Limitations & Assumptions

- Increasingly reactive environment.
- Lack of qualitative research and evidence of lived experience.
- Dependent on hand-offs between siloed teams, leaving little room for collaboration.
- Inability to address the practical on-the-ground needs of implementation teams and providers.

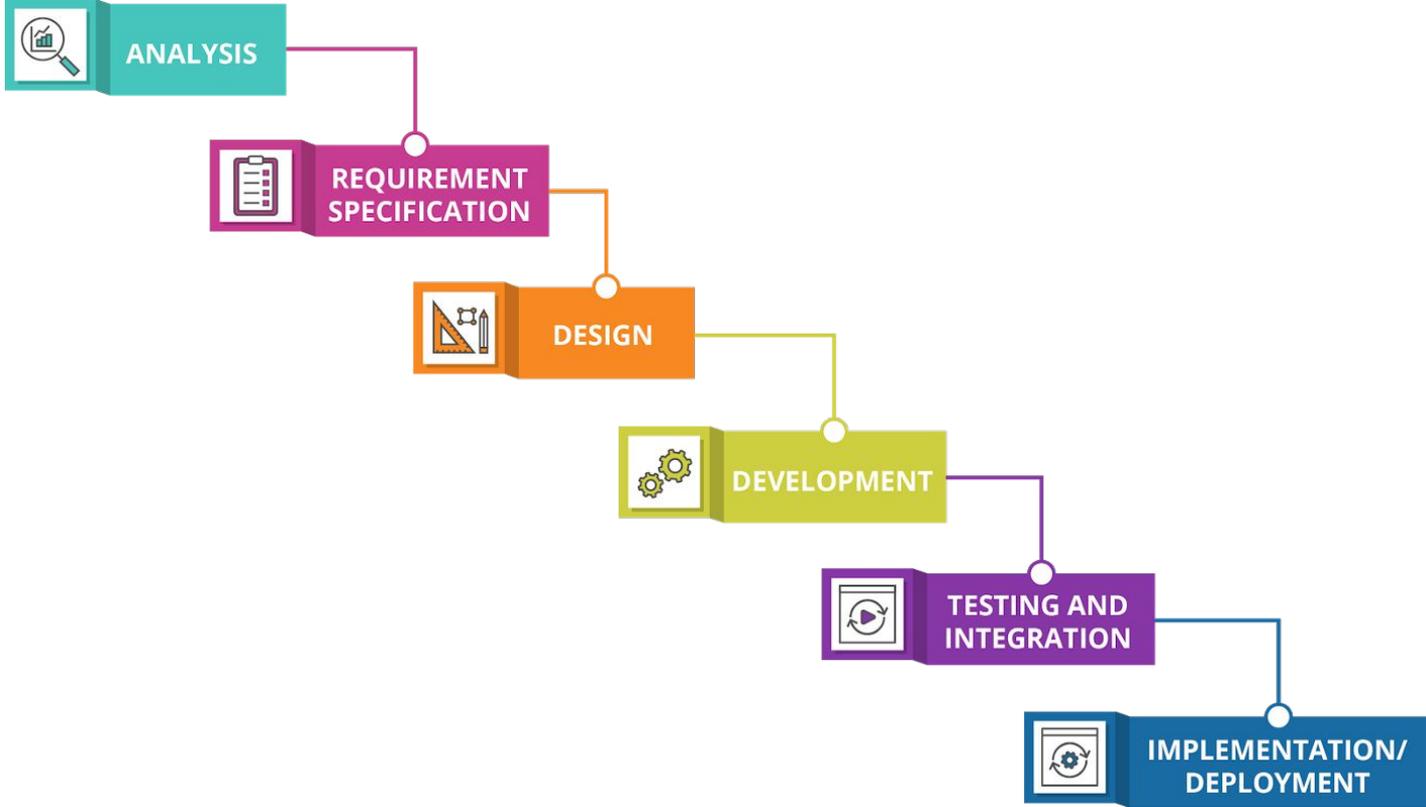

Limitations & Assumptions

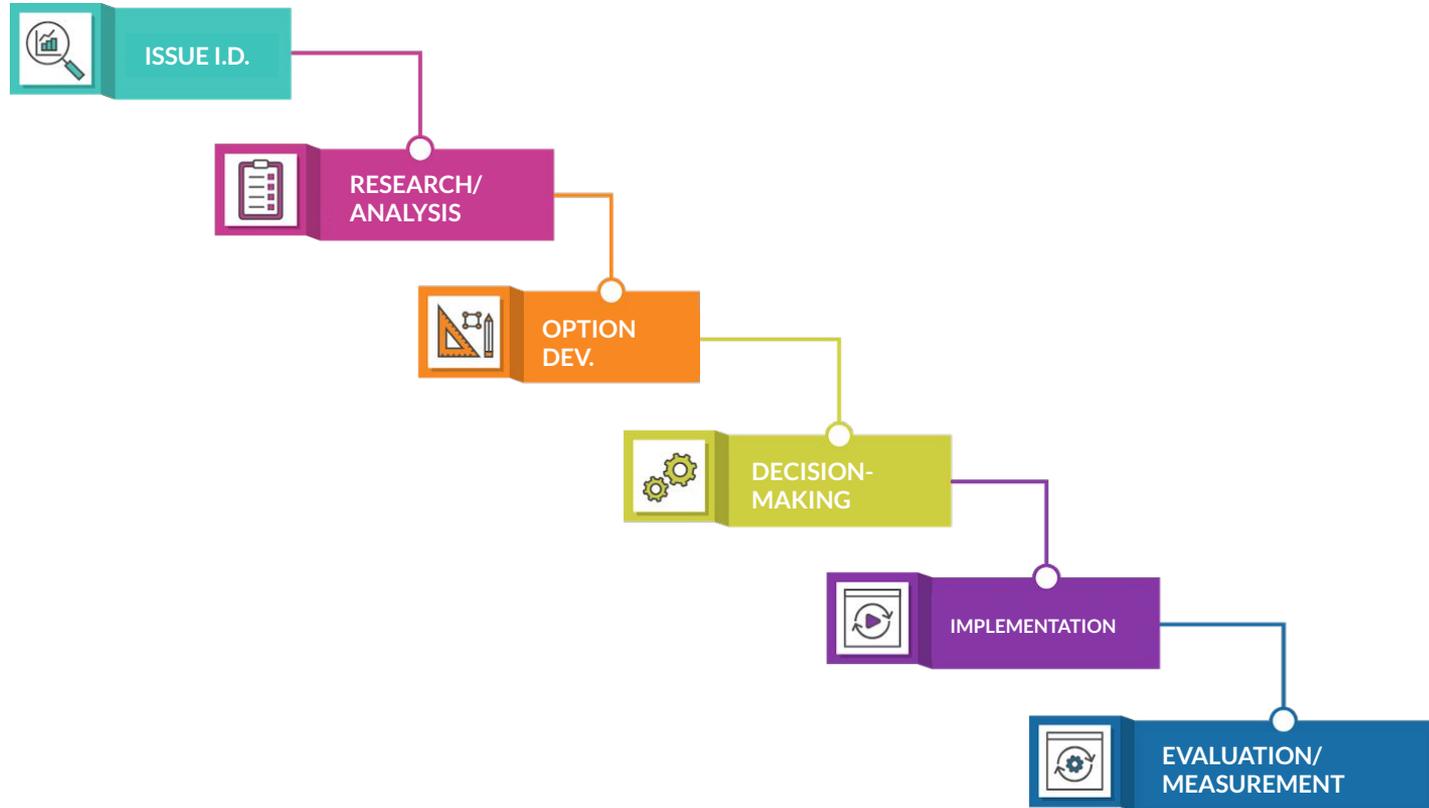

- Decisions made with recommendations that are not tested or prototyped in the real world.
- Evaluation rarely informs learning.
- **Primarily focused on the production of documents, rather than the production of outcomes.**

Waterfall Methodology

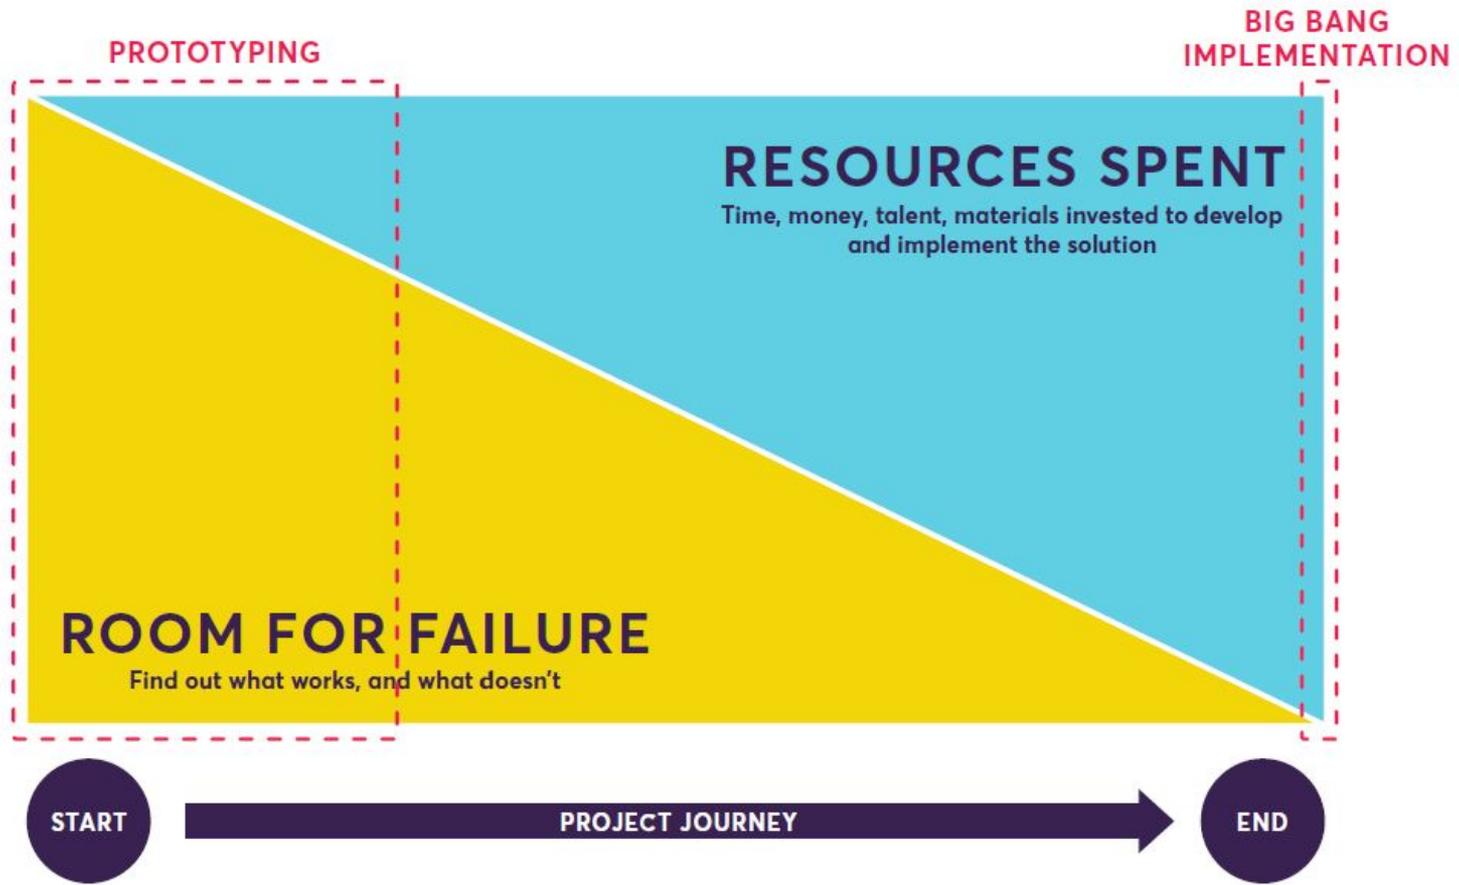

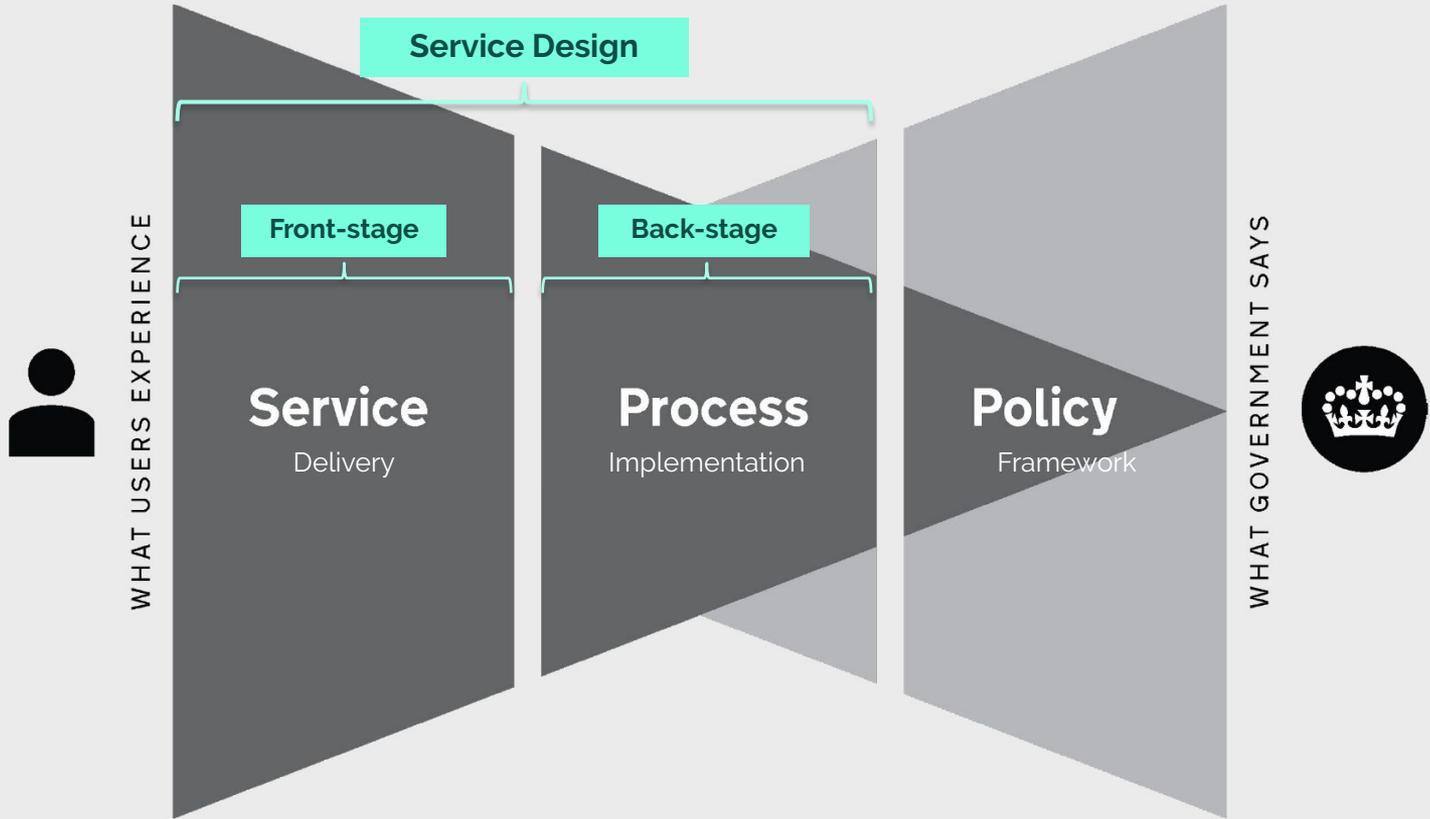

Waterfall Policy Methodology

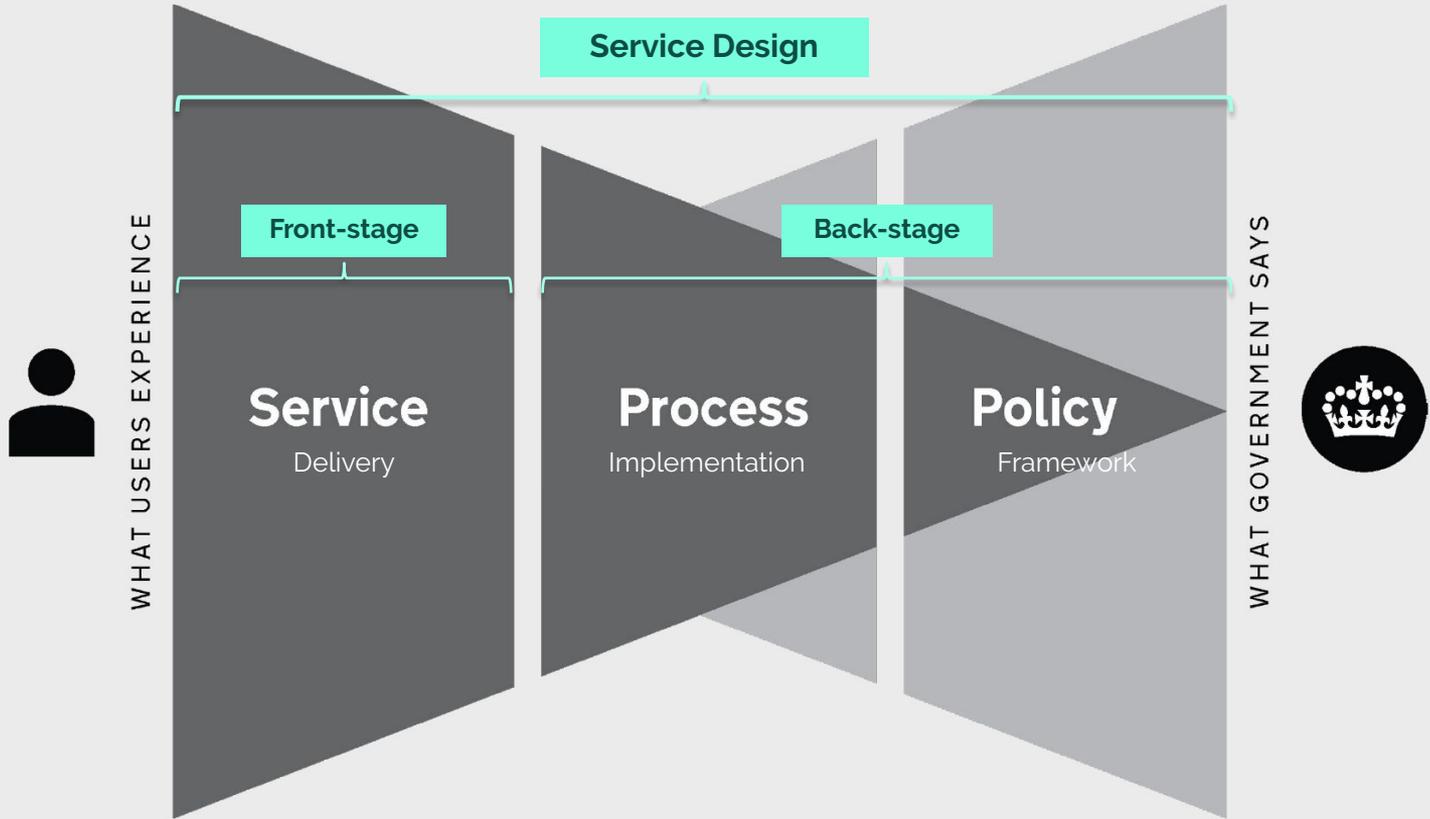

Iterative/Agile Methodology

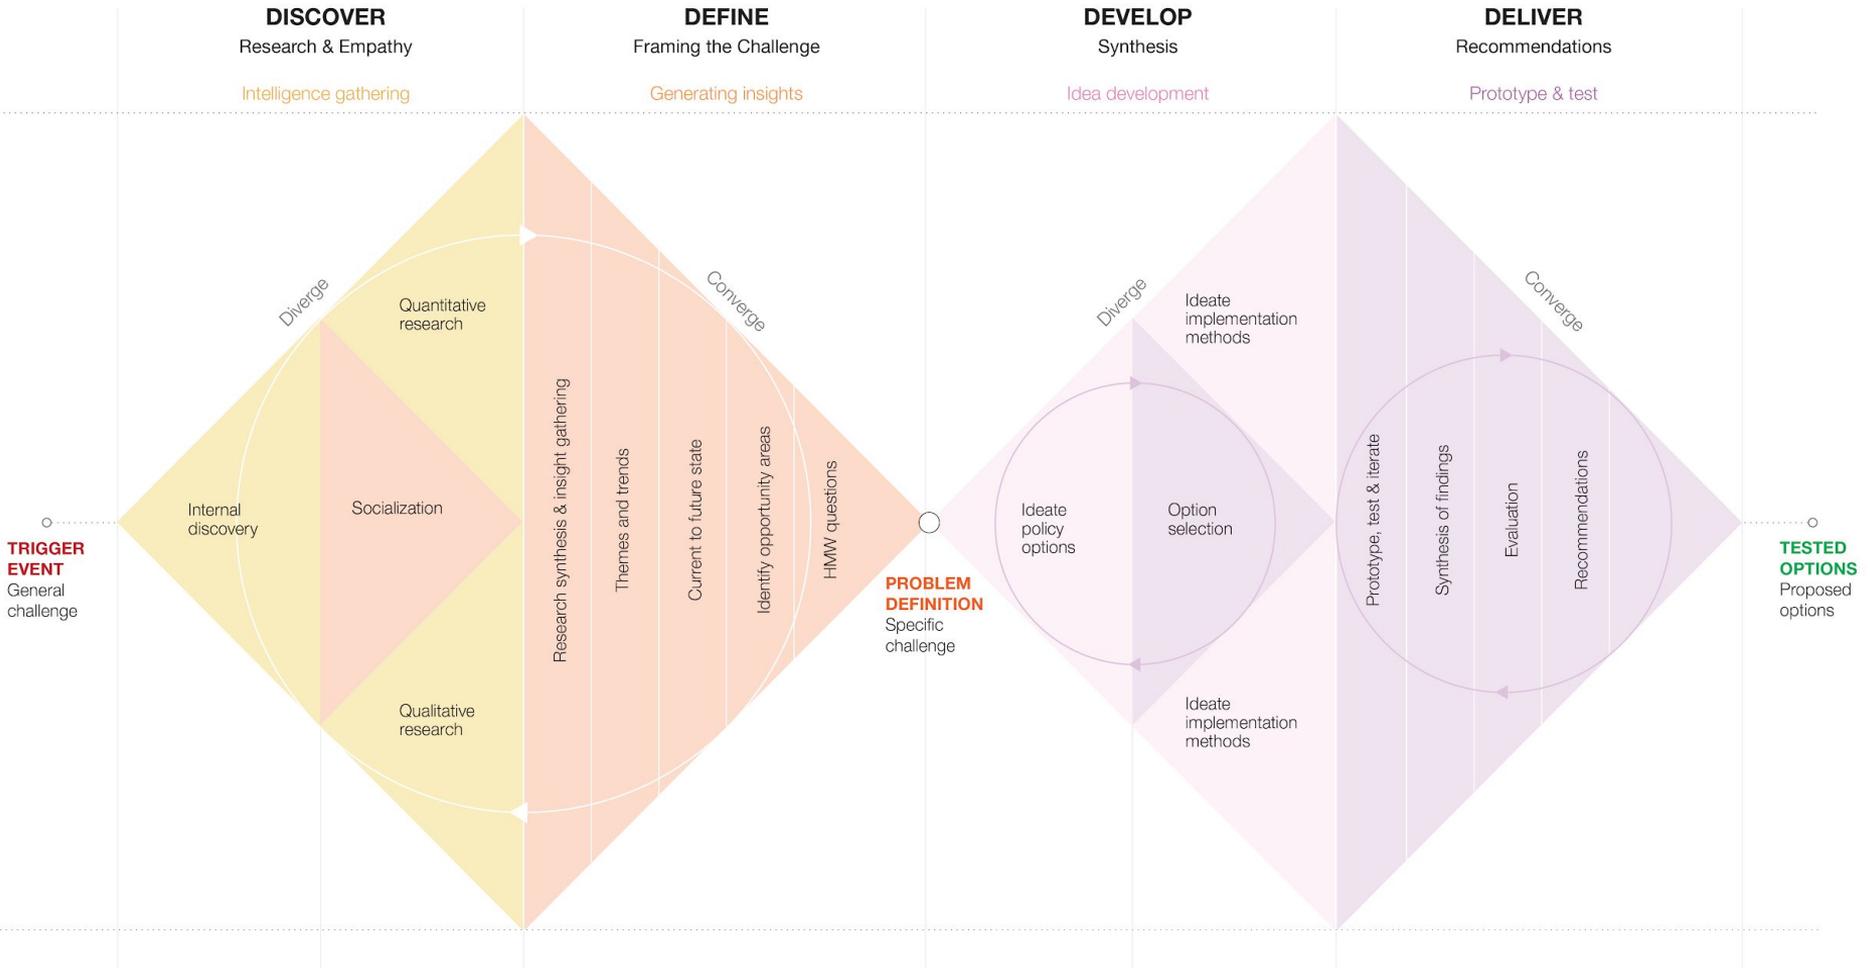

REFRAME

Polycymaking **is**
human-centred design.

WORKING HYPOTHESIS

Policy-as-a-Service is an iterative, user-centred approach that integrates policymaking, design and implementation to deliver better quality outcomes for citizens, employees, and stakeholders.

EVIDENCE & ACTIVITIES

- Internal Discovery
- Organizational inquiry
 - Existing policies
 - Cross-ministerial coordination
 - Trend analysis
 - Secondary research

- Qualitative Research
- Contextual interviews
 - Ethnographic research
 - Observation
 - User journey mapping
 - Participant recruitment
 - Cultural probes
 - Service safari
 - Surveys

- Quantitative Research
- Literature review
 - Desk research
 - Jurisdictional scans
 - STEEP analysis
 - Stakeholder mapping

- Socialization
- Partnerships (internal, external)
 - Team assembly
 - Stakeholder engagement

- Generating Insights
- Systems mapping: current state
 - Systems mapping: future state
 - User personas
 - Prioritization
 - "How might we...?" framing
 - Crowdsourcing
 - Horizon scanning
 - Value proposition

- Problem Definition
- Key challenge/questions
 - Strategy
 - "How might we..."
 - Opportunity areas

- Ideate Policy Options
- Rapid brainstorming
 - Mindmapping
 - Participatory workshops
 - Journey mapping
 - The Anti-Problem
 - Mash-up

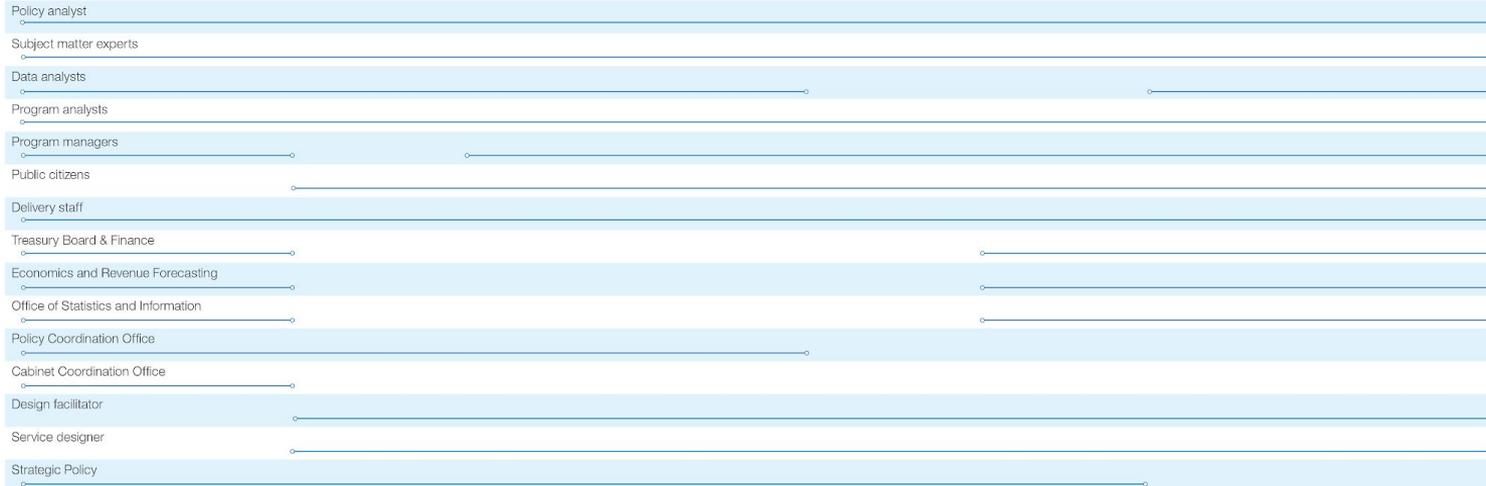

- Option Selection
- Prioritization
 - Affinity mapping
 - Rose/bud/thorn
 - Dot voting
 - SWOT analysis
 - GBA+ analysis

- Ideate Implementation Methods
- Brainstorming
 - Participatory workshops
 - Journey mapping
 - IT architecture planning
 - Strategy

- Prototype & Test
- Physical prototyping
 - Digital prototyping
 - Storyboarding
 - Service blueprinting
 - Role playing
 - Service rehearsals
 - Experience prototyping
 - Table-top prototyping
 - Futures scenarios
 - Gamification
 - MVP (minimum viable product)
 - Evaluation programme

- Tested Options
- Synthesis
 - Recommendations

PARTICIPANTS

Challenges & Tensions of Adoption

- Applicability of design methods to policymaking
- Executive leadership adoption and endorsement
- Making time and space for upstream design thinking
- Design management, leadership and mentoring
- Engaging with end-users instead of intermediaries/proxies
- Reconciling government mandates with citizen-informed priorities
- Design research as a low-risk, critical form of engagement

How might...

- the reframing of policy as a form of service change our attitudes, behaviours and beliefs?
- integrating human-centred design reshape the conduct of public policy from static regulation to iterative collaboration?
- closely integrating policy makers with delivery teams improve outcomes for the public?

PROTOTYPE

Let's test this thing!

A close-up photograph of two honey bees on a yellow flower. One bee is positioned higher and further to the right, while the other is lower and further to the left. The background is a soft-focus green and yellow, suggesting a natural outdoor setting. The text is overlaid on the left side of the image.

Save the Bees!

Large commercial agri-businesses in southern Alberta have adopted a new type of pesticide. However, smaller agricultural businesses – specifically honey farms - are noticing rapidly decreasing bee populations as a result.

The Alberta BeeKeepers Commission is calling for a ban on the pesticide and asking the Government of Alberta to intervene in order to save the bees from further risk of extinction and maintain Alberta's position as the #1 honey producer in Canada.

FOR GROUP DISCUSSION

ROSE

What advantages or opportunities exist for working with this type of approach?

BUD

What potential might this approach offer for tackling existing policy challenges?

THORN

What disadvantages or obstacles might exist with this type of approach?

FOR SELF-REFLECTION

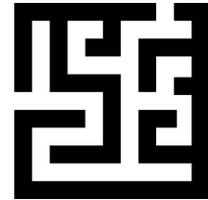

What's Sticking?

What's Promising?

What's Puzzling?

Upcoming Events

SDX Holiday Social

Hacking Service Design

Exploring formal & informal workarounds to implementing service design

January 21, 2020

HAPPY HOLIDAYS

Wishing you and yours a
wonderful holiday season!

TERM OF THE DAY: **POLICY**

Public policy formulates a course of action (or inaction) for the government that is implemented through various tools.
